Character bio template pdf generator free online free

Choose a character from the book you are reading. Sketch a portrait in the box below and use what you have read to complete the different parts of the character profile.

Name of character:

_____

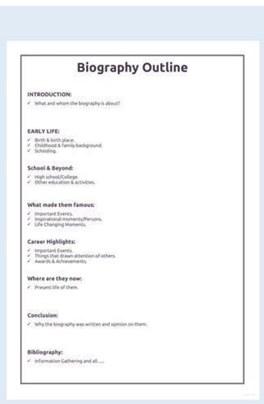
Title of book:

_____

Author of book:

_____

Description of character:
Some words or phrases from the story to describe the character:
What the character does:
How the character changes throughout the story:



Biography Outline

INTRODUCTION:
- What and whom the biography is about?

EARLY LIFE:
- Birth & birth place.
- Childhood & family background.
- Schooling.

School & Beyond:
- High school/College.
- Other education & activities.

What made them famous:
- Important Events.
- Inspirational moments/Persons.
- Life Changing Moments.

Career Highlights:
- Important Events.
- Things that drawn attention of others.
- Awards & Achievements.

Where are they now:
- Present life of them.

Conclusion:
- Why the biography was written and opinion on them.

Bibliography:
- Information Gathering and all.....

Name _____
Date _____

Biography

A biography is a history of a person's life.

Person's Name _____

My character

By: _____

Name: _____ Age: _____

My character's 3 favourite things to do: _____

_____

_____

My character's 3 least favourite things to do: ____

_____

_____

Favourite food: _____

Least favourite food: _____

Lives with: _____

Lives in: _____

Best friends: _____

Worst enemy: _____

My character's hair is: _____

_____

Eye colour: _____

Likes to wear: _____

Circle up to 5 character traits:

kind nasty talkative shy crazy

friendly funny rude smelly curious

helpful angry spoiled brave lonely

Name:

Story Outline

For your midterm, you will be telling us a story from your life. There are only three requirements for this:

1. **Tell us a story from your life.**
2. **Make it a good story.**
3. **Make it 3 minutes long.**

To help you plan for this, let's review the concepts we have discussed so far.

1. Make sure your audience can connect/relate to your characters.

How do you make characters relatable?

1. **They need real flaws. (Cowardice, anger, arrogance, paranoia, self-doubt, impulsiveness, greed)**
2. **Give them quirks. (Everyone has little habits/preferences that would seem weird to others.)**
3. **Give characters conflicting traits. Have them break stereotypes. Make them surprising. (A doting grandmother who is also self-serving and manipulative.)**
4. **Give characters hopes, dreams, fears, pain, and problems. (All humans have these. Every good character has an itch they can't seem to scratch.)**
5. **Give them a past. (This can help explain a character's motivation).**

How do you reveal a character's traits?

1. **By psychological description.**
2. **By physical description.**
3. **By what they say.**
4. **By what others say about them.**
5. **By their reaction to others.**
6. **By how they say it.**
7. **By what they think.**
8. **By what they do.**
9. **By their reaction to their environment.**
10. **By their reaction to themselves.**

For the top 4 characters in your story, plan how you will make the character relatable, and how you will reveal these traits in the story. Use the notes above to help you. (Note: You don't need to do this for every character in the story. Some characters are best off as flat characters so as not to slow the story down.)

Character:	How will you make this character relatable?	How will you reveal this character's traits in the story?
1.		
2.		
3.		

Character bio template pdf. Character bio template copy and paste.

Whether that means cutting and pasting my prompts into a Word doc, or even buying a notebook and filling it with nothing but characterisation notes, you need to construct a template of headers and questions that work for you! Let's start with the simple questions first. Character Perspectives, Outlook, and Opinions You may think your characters don't have opinions yet, but that's because you haven't asked them. Keep up with our news, membership offers, and updates by signing up to our newsletter. For more writing articles take a look at our blog page or join our free writer's community. Even if you have decided your character is mean, narcissistic, and aggressive, ask yourself why. In fact, even the most implausible story ideas can capture the hearts of many, if they get the connection with the characters right. Take, for instance, the story of Eleanor Oliphant, in the novel Eleanor Oliphant Is Completely Fine. So it's important to know the following before you start: What stage in life is my character in at the start of the story?What stage of life will they be in at the end?What has been the character's greatest achievement in life?What has been their top three life defining moments? If 'X' hadn't happened to your character, how would life be different now?How would your character describe their life right now? List the major life events in chronological order from birth to now and highlight major events that have changed the course of their life. But truly knowing your characters like this means you will create well-rounded, real, and vivid characters that will jump from the page and capture the heart of your readers. There are plenty of detailed character profile templates out there for you to use, adapt, and play with. Some are spreadsheets, some Word documents, some forms to fill in. Personal Preferences of the Character (e.g. political / tastes / cultural) You can have a lot of fun with this one. Ask yourself these questions: Spouse/significant other?Are the character's parents still around?Do they have any siblings?Are they the oldest/youngest in the family?Is there an extended family/family support system? Elevating a book from a good idea, to a compelling and addictive read, hinges on deep characterisation. But you have built this fictional person, given them features, history, flaws, and dreams… so you shouldn't be surprised when they suddenly have their own opinions. A character profile is a document that you, as an author, compiles during the (preferably) beginning stages of a first draft. You would be surprised how much of a difference it makes when creating a well-rounded character. And how do they feel about your character? Does your character get involved with colleagues outside of work hours, and how does this affect their work/home life balance?What is their greatest career achievement?How did they do in school? The program code in the BIOS differs from ordinary software in that it acts as an integral part of your computer, defining what your computer is and what it can do. If it's a sense of loneliness, has it been there since school? Even in the newest of PCs, most of the BIOS is ancient. You must be willing to ask, listen, and analyse. And finally, ask some of your own questions. Why? Where would we find your character on a wet and rainy day? How would a typical weekend play out in your character's world? Consequently, the BIOS used to be called the ROM BIOS, though today they are more commonly called "Flash BIOS" given they use Flash memory technology, as we'll soon discuss in more detail. We'll take a tour of the history, development, and operation of the BIOS. Career and Education Even if this isn't mentioned explicitly in your novel, knowing how your character acted at school and what they do for a living is so important. Called system setup, this BIOS function lets you adjust the hardware settings of your computer, from things as basic as setting the clock to those as powerful as adjusting the speed of your microprocessor and memory. Physical Attributes Again, these help your reader see your character. The BIOS is the mystical part of your computer. You are interviewing them for the story of their lives, and you are not leaving until you know each and every last detail. It's up to you how you put your character profile template together, whether you go for handwritten notes or a fancy spreadsheet, just remember – the deeper you dig, the more gold you will find. Once you have built a detailed psychological profile of each important character, you will have all the power you need to help make them come alive on the page! And who knows? Essentially, your character bio template can be anything you want it to be, as long as it helps you see, smell, touch, and hear your characters in your mind. It may even inspire new plot twists and scenarios or highlight plot holes. Invisible and little understood, it lurks in the background, exerting its influence clandestinely–at least until it stands in the way of using a new hard disk or prevents your modem from talking at full speed. Don't be surprised if your plot changes as your main character deepens. However, small nuggets of this information will always feed into your story if you are adding the required depth of character. Asking questions like these can help you figure out the motivation and underlying issues your character is dealing with. Work life can change a personality completely. How does your character view their work colleagues? 800+ Templates, 120+ Integrations You have a great idea for a book, but you don't yet know anything about your main character (being 'tall, dark, and handsome' is not enough to move a story forward). How to Develop Your Character Profile Template Essentially, what you are doing with a character bio template, is sitting down with a large pot of tea and a box of tissues and asking an imaginary person as many deep and meaningful questions as you can. You are the therapist who wants to know all their secrets, worries, and desires. Or perhaps you're struggling with your latest novel and can't work out your character's motivation. (See section, "BIOS Upgrades".) In everyday operation, however, you and your software will use core BIOS code only if you still run a prehistoric operating system such as DOS or Windows 3.1. If you're not a software archeologist, the one function of the BIOS that's most important to you was not part of the original design of the BIOS at all. The program code that makes up the BIOS has roots that stretch back all the way to the first IBM Personal Computer, released in 1981. Deep Characterisation is Vital in Good Storytelling As much as we love to plan and predict what we are writing, there's nothing more exciting for a writer than when a twist comes out of the blue and you didn't see it coming. Were they popular? Like a pull-starter, this core code is only briefly active. Learn the secret of the BIOS cabala, however, and you can make your system faster and impregnable. Neither you nor your programs ever see the BIOS again (at least until your reboot), though portions of the BIOS are used to program low-level chipset functions and interact with system devices for power management control. No one else in the world needs to know any of the answers to these questions because it's up to you what to reveal to your readers and what to keep hidden. The only time you're likely to become aware of your computer's BIOS is when one of these low-level functions doesn't quite match with your hardware, and part of your computer won't function right–or function at all. You can also sign up for our FREE Jericho Writers Character Building worksheet. In short, your character template sheet should be crammed with as much information as you can think of. Could this be a sign of vanity, or maybe those bitten nails are a sign of anxiety? Now you know exactly how your character will react, and why, those twists will be much easier to write. It can also be a handy tool to check details and continuity during the editing process. But don't be intimidated! Character template writing needn't be boring or laborious. What do they think of the state of the world right now? What is the one thing they would change if they could?What is the one thing holding them back from true happiness right now? And do they really believe they will be happy if that one thing were to change? But that's not all it is. Same applies to their nationality and heritage. Once you've loaded your operating system–be it Linux or any flavor of Windows from 95 to XP–the major part of the BIOS adroitly steps out of the way. Basic Characteristics It's so important to be able to see your characters in your mind, therefore start with what they look like and who they are. Don't skip the easy stuff, but don't stop there. What is a Character Profile? At this stage you may even find yourself creating complicated spider diagrams to see how your main character connects with the rest of the cast. Again, this is surface-level, but look what happens when you start digging a little deeper… How do they get on with each of the family members? What do those family members think of your character? Would they be honest about this to their face and if not why?What's the character's first/oldest memory?What member of their family/support system would your character turn to in a crisis?How would they react?Does your character trust members of the family and vice versa?If your character is married, where did they meet? By this point in your character profile template, you should know so much about your character, that this section will seem instinctive. A character profile template will allow you to keep all the important details about your protagonist/antagonist in one place to be used as a writing resource when attempting your first draft. Start asking questions that really test you as a creative writer. BIOS stands for Basic Input/Output System and that is the electronic equivalent of the pull-starter on a lawnmower–ancient technology you need to get going but don't use again. Why is that there? Who gave it to him and why? Why? Do they walk with a slight hunch due to consistent back pain that they have grown accustomed to living with over the years? These are a few that have arisen after years or doing this exercise: Who is your character's biggest inspiration and why?How does your character spend the week before this story begins?If your character could jump back in time to one particular point, where would it be and why?What is your character's most prized possession?Name four things your character would change about themselves. Unlike other programs, the BIOS is a permanent part of your computer. Readers get invested in a story because they relate to the character on the page, or because they are invested in their growth. Family and Relationships This is an important section of your character trait bible because it's not until you begin excavating relationship dynamics, that you truly get to know who you're writing about. Do they act the same way around other people or does bravado make this person take risks they wouldn't normally?An optimist or pessimist?An introvert or extrovert?What do you think is your character's biggest flaw? What does your character believe is their biggest flaw?What is their greatest strength? It's also invaluable when writing a series of books, as it saves you having to re-read your books to remember back story and character traits. Often that's a matter of chance, but not now. Or, in this case, all the ingredients you need to create your own bespoke character profile template. If your character is lying to you (and you know it), ask yourself what they are afraid of. But I think the best way to get to know your characters is to develop your own outline based on the questions highlighted in this article. Let's go deeper. They stick around because the characters feel real. But characters won't feel real to your readers if they aren't real to you. And although 90% of what you discover about your characters will never make it to your novel, having a deeper understanding of your characters and their motivations means that when you put them in certain situations, they will show their true selves in the most natural way. Finding and dealing with continuity issues in your manuscript is so much easier if you have a reference guide to check – and it will also save you a lot of hassle when your editor and proof-readers ask for a list of names and places. And, finally, we'll walk you beyond your current BIOS and show how you can–and should–upgrade it to keep your computer in-line with current times and technologies. (See related story, "BIOS System Customization".) If you want to go extreme and squeeze a few percent of hidden speed from your system, this BIOS function is your primary tool–if the maker of your computer's motherboard has chosen to give you such God-like setup power. What happened in the past to make them this way? Are they… Cautious or spontaneous? A daredevil or worry-wart? Even in the newest systems, the core of this code remains functionally identical to that in decades-old machines. In this section, try to be honest and answer from your character's point of view, not your own. Did their early school life affect their chosen career? This is where a well-crafted character bio template comes in. It doesn't load from disk but instead is stored in special Read-Only Memory chips. Life Stages, Milestones, and Backstory This section is generally filled with information that you (and only you) will ever know about your character, because no one needs to endure an 'info dump' about each character's backstory. Health can be a big issue in our day to day lives, so we should be aware of it with our characters, too. Don't be surprised if this exercise begins to alter your plot and deepen your twists. From the moment it starts, it is dedicated to running your system. It has little to do with input and output but is key to making your computer work the way you want it to. Remember that most of our adult life is spent working with, and surrounded by, others. The answers to these questions will filter in like softly spun gold through the pages of your novel. Get down to the nitty gritty, even if most of this won't appear in your book. Start with: Hair colour Eye colour HeightAny physical disabilities Then take those simple thoughts and dig around some more. What about that scar on his left cheek? There are no hard and fast 'rules' about what you can and can't include. It is hardware-specific, matched exactly to the circuits of your computer. Why? Also, vendors are constantly correcting little BIOS bugs (that sometimes surface under esoteric or limited conditions) to ensure proper operation of your system. Look at you go! The character that you only previously knew as 'tall, dark, and handsome' is fast becoming a fascinating, deep, and 3D guy. Your character bio template not only helps when creating your first draft, it also acts as the perfect reference guide and checklist during edits. For instance, if you can't remember the name of your MC's sister's boyfriend, no problem, because you will have written all that information down in your 'family and relationships' section. The character template should document everything about your character's life – from how they look to mannerisms and their back story. Personality Traits This will most likely be the most in-depth section of your character template – but again, don't stick to the surface. And your character bios don't have to be cumbersome, lengthy or complicated. Does this change his behaviour when out in public?Does she have painted nails, or chipped bitten nails? Writing your character creation template is important, because if you don't understand your character fully, then neither will your readers. We all know that the concept or plot is what makes us read the first few chapters, but it's the characters that keep us turning the pages. And how would they react if someone found out?Are they the type to crumble under interrogation, or lie to conceal the truth? It differs from other programs in two ways, how it is packaged and the functions it is meant to carry out. The BIOS has assumed control of adjusting the configuration of your computer, and therefore you should know how to take advantage of it and how to push its limits.The BIOS is actually nothing more than a computer program, a set of instructions that tell the microprocessor in your computer what to do. Be prepared, because many of the opinions you discover they have may not be your own. Start with the basics and ask why: Favourite colourFavourite foodFavourite musicFavourite restaurantReligious beliefsSpiritual beliefsPolitical affiliations Then, get deeper still… Is there is a certain phrase your character says all the time?Do they swear and if so, what cuss words does he/she prefer? What hobbies does your character have? When deciding on a character name, question why. Was that name passed down by a grandmother? Does that mean that family ties are important to this character? Something as basic as a name can throw up so much depth and understanding about a character, and small important details can be dropped into your novel to add depth and roundness. Love at first sight? Were friends happy about the union? Any other character in her place, anyone less unique and complicated than her, would have made an intriguing and riveting book really quite dull. If it's a sense of entitlement, could that have come from their upbringing? Flesh out the 'whys' and enhance your character development, and the plot twists (or holes) will reveal themselves. The cure is to upgrade your BIOS with a new version that brings the BIOS code-base more in-line with your new peripherals. Why?What is their darkest secret? Could bad health or hypochondria run the family? Does your character use health issues as a barrier? Do they eat well, or binge eat late at night? Health What's your character's health like? Smoker?Drinker?Exercise regularly? Is he self-conscious about it? (See related story, "BIOS Tuning".)This article will look at the BIOS from several angles, including its hardware and software underpinnings and how it works. Ask questions that will push you to find out the deeper motivations, such as: What is your characters biggest regret? Jericho Writers is a global membership group for writers, providing everything you need to get published. So how do you create that with the help of a character bio profile?* *Before we start – a word of warning Once you learn the art of writing a character profile template, you will never look at your characters the same way again. So let's begin… Creating a character profile will essentially develop the bible that your leading players will live by. Were family members accepting? A career can signal so much about a person and can help you develop who they are simply by looking at what they have chosen to dedicate their life to. Does the character have a job?How long have they been in chosen career?Are they happy?What job would they choose if they could retrain?Is their job important to them?What are their main priorities in life and where does career fit in?
